**DETAILED ACTION*****Response to Amendment***

The rejection of the claims as described in paper no.13 have been withdrawn in view of the amendment filed on February 17, 2004 and in view of the affidavit filed on November 26, 2003. The closest prior art reference of Sweet (US 5,643,442) does not disclose treating the claimed naphtha feed to separate the sulfur compounds from the non-aromatic compounds to obtain a retentate having a sulfur content of less than 100 ppm and containing greater than 50 wt% of the olefins present in the feed. The declaration of White filed on November 26, 2003 indicates that the feeds of Sweet are chemically different from the claimed naphtha feeds and the Sweet reference would not suggest the use of the claimed naphtha feeds in the Sweet process.

A new rejection follows.

***Claim Objections***

Claims 65 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form.

Claim 65 fails to further limit claim 60 because the cracked naphtha of claim 65 appears to expand the list of the naphtha feeds listed in claim 60.

### ***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 60, 61, 63-77, 81, and 85 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1, 2, 4, 6-23, 78, and 82 of copending Application No. 10/382409. Although the conflicting claims are not identical, they are not patentably distinct from each other because each set of claims is drawn to a process in which a naphtha feed is contacted with a membrane that may be a polyurea-urethane membrane in order to recover a product with a reduced sulfur content. The claims in application 10/382409 include additional limitations such as reciting the conditions for the process. However, the claims in the present application would have been modified by one having ordinary skill in the art to include these limitations because one would operate the process at conditions that will maximize the efficiency of the process.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
